Summary

MCA student with strong expertise in full-stack web development, specializing in building responsive, user-friendly, and scalable web applications. Experienced in front-end frameworks, backend integration, and modern UI design. Adept at solving real-world problems through technology with hands-on projects in healthcare, education, and services domains.

Experience

Frontend Developer Trainee | HackHunt Cybersecure LLP. **Sep 2025 – Present**

- Worked on developing and maintaining **responsive user interfaces** using modern frontend technologies.
- Implemented new features and UI components based on project requirements.
- Collaborated with founders and team members to understand requirements and deliver updates on time.
- Improved existing UI by fixing bugs, enhancing usability, and optimizing performance.
- Followed proper **Git version control practices**, including regular commits and branch management.

Summer Training

Front-End Web Development Training | Gokboru Tech Pvt Ltd **June 2024 - July 2024**

- Built responsive and interactive web applications using HTML, CSS, and JavaScript.
- Developed projects such as **Amazon Clone Website** and **To-Do List App**.
- Gained hands-on experience in UI Development and API integration.

Projects

Student Management System | *HTML, CSS, JavaScript, PHP, Bootstrap, MySQL* **October 2024**

- Developed a **web-based system** to streamline student data management for institutions.
- Implemented role-based authentication (admin, students) to ensure data secure.
- Built a robust **admin panel**, reducing manual data handling efforts by ~40%.

Gardening Services | *HTML, CSS, JavaScript, Responsive Design* **November 2024**

- Designed a **responsive business website** for gardening services.
- Built a **dynamic maintenance form** for booking services online.
- Showcased services, Pricing, and contact details in a structured, customer-friendly layout.

MediCare Plus (Healthcare Platform) | *HTML, CSS, JavaScript, Tailwind, GSAP* **June 2025**

- Engineered a responsive healthcare website with AI-based symptom checker, appointment booking, and emergency help features.
- Integrated video consultation, doctor availability, and animated health tips, improving user engagement by 30%.
- Designed a modern UI using Tailwind CSS and GSAP for smooth animations.
